Skills

- JavaScript| Python| C| Java| Go | Solidity | MySQL| Postgres | | Tailwind
- React | Nextjs| Fastapi| Docker| REST| GraphQL| Git| Ethers| Foundry| IPFS | Kafka| gRPC| webRTC.
- Micorservices| Distributed Systems| Blockchains| Fullstack| Browser extensions

Experience

Upwork / Freelance full-stack developer
OCTOBER 2020 - PRESENT, REMOTE

- Built full-blown websites for clients to power their business needs, both back-end and front-end
- Designed and built scalable APIs for eCommerce sites to handle thousands of concurrent requests at any given time.
- Designed and built scalable blockchain projects and deployed them to Ethereum and other EVM-based blockchains.

Format Labs/ Research Engineer
MARCH 2022 - PRESENT, REMOTE

- Exploring cross-chain interoperability among blockchains and testing for vulnerabilities that can occur in such channels.
- Designed and Built Omnipe a cross-chain crypto payments network proof of concept project. Which was nominated for Chainlink's top 40 projects in Spring 2022.

Education

KCA University / Degree
SEPTEMBER 2020 -DECEMBER 2024, NAIROBI

Pursuing a Bachelors degree in Software Development

Dapp University/ certificate
MARCH 2021 - JULY 2021, REMOTE

Finished the Dapp University Blockchain Development Bootcamp
